Economic and social development.
Building economic opportunities and better working conditions for rural people. Social inclusion of human resources of the company. Reducing migration of rural people toward cities.

BIOBES has invested in new modern dryers that help in conservation of essential oils content and quality of products. In 2019, BIOBES invested in establishment of drying chambers in rural area of Tepelene, close to the farmers that are involved in wild collection and cultivation of medicinal and aromatic plants. Renewable biomass energy is used for products drying.

7

Cluster foundation

In 2019, BIOBES initiated the foundation of cluster, an organization that includes harvesters of wild MAPs, farmers that cultivate MAPs, regional collectors, experts of the public and private sector, and representatives of the Municipalities.

The objective of this organization is that all the involved stakeholders, can closely collaborate for the improvement of MAP's quality and sustainability of spontaneous flora.

BioBes

Trust the Nature

Cultivation and export
of medicinal and aromatic plants.

1 About Us

BIOBES is an Albanian company that works in the sector of wild collection, cultivation, processing and export of aromatic and medicinal plants.

The business idea of BIOBES is based on the principle of supporting the small familiar farms in rural areas that have tradition in cultivation and wild collection of aromatic and medicinal plants. Actually, the company collaborates closely with about 400 rural families based on principles of mutual interest and fair trade.

2 Cultivation of Aromatic and Medicinal plants

High standards of cultivation practices. Environmentally friendly agro technical practices and crop rotation are applied.

Organic production is on the focus of the company and it is growing rapidly.

3 Wild flora collection

BIOBES has established a sustainable network of wild flora collectors and has access in all the country and in all types of medicinal and aromatic plants. Responsible management of wild flora collection.

4 Products

Thanks to the warm Mediterranean climate, the beautiful sunshine and virgin mountains, Albania offers more than 350 different aromatic and medicinal plants of excellent quality. BIOBES is working mainly with the following aromatic and medicinal plants.

As the company has a good network with suppliers can provide also other products that are not mentioned in this list.
